Dear Ms. Bose:

As a Calvert County employee, there is nothing I would like more than to see this county benefit from the rich resource we have here in Dominion's LNG plant. You have done a great service to us by completing an objective and an exhaustive 2 years of research on their proposed export terminal. Your report is well documented, with over 22,000 pages of facts. Plus, Cove Point will generate \$2.3 billion in sales revenue for our local county businesses. We need that kind of boost here in Calvert! The citizens have spoken loudly in favor of this project, and it is clear why, as the facts prove that this operation can be conducted safely with no significant environmental impact. I urge you to act in favor of the facts you have so thoroughly presented, and to give your final approval of this project today.

Thank you,

Bruce Bevard
